

**BELLINI YACHT LAUNCHES ASTOR 58**  
**THE NEW WALKAROUND OPEN IN THE RANGE**  
**World premiere at the Cannes Yachting Festival 2025**

---

Bellini Yacht will officially present the ASTOR 58 at the 2025 Cannes Yachting Festival, the new walkaround open that combines sporty performance, engineering excellence, and innovative design. This is the second model in the Bellini Yacht range, following the ASTOR 36, which was unveiled at the 2024 Cannes Yachting Festival and marked the Lake Iseo Group's return to boat production, just as at the beginning of its history

"With the ASTOR 58, we are writing a new chapter in our history," says Battista Bellini, CEO of the Bellini Group. "After the success of the ASTOR 36, the introduction of the 58-foot model represents a natural evolution of our portfolio, capable of substantially responding to the growing demand for boats that combine functionality, design, and performance. This new creation is born with the ambition to offer an advanced navigation experience while preserving intact the heritage of innovation and artisanal craftsmanship that has always distinguished our Group. The 58-foot embodies a refined harmony between dynamism and generous volumes, offering greater autonomy at sea without sacrificing the aesthetics and authentic emotions that an open yacht delivers.

As with the first 36-foot model, the ASTOR 58 is the result of the collaboration between Norberto Ferretti and Brunello Acampora. Ferretti, founder of the Ferretti Group and a leading figure in the design, construction, and marketing of high-end yachts that combine innovation, elegance, and cutting-edge technology, is responsible for the "product concept" and development of the new Bellini Yacht models. Brunello Acampora, internationally renowned boat designer and founder of the engineering and design studio "Victory Design," is entrusted with the design of the hull for each model.

The ASTOR 58 is a 58-foot walkaround open type that combines spacious interiors, functionality, performance, and a close connection with the sea, offering a unique and silent navigation experience. Measuring 18 meters overall length and 5.35 meters in width, it is equipped with two Volvo Penta D11 IPS 950 725 HP engines.

The interior layout is designed to offer multifunctional areas and a comfortable, open environment, characterized by great attention to detail, with high-quality materials and refined finishes. A large cockpit with a bar cabinet and guest bathroom serves as the entrance to access the three bedrooms: the owner's cabin at the bow with separate bathroom, the VIP cabin also with separate bathroom, and the third cabin with two separate beds.

Regarding the exterior, the design of the ASTOR 58 maintains the family feeling of the range, combining clean lines with sporty elements, giving the model a unique and recognizable appearance. The exterior layout is designed to offer maximum comfort to all guests on board: the living area can accommodate up to 10 people seated at the table, while the sunbathing areas at the bow and stern are designed to guarantee perfect relaxation

without compromise. The fold-down terraces, a distinctive feature of the ASTOR range, allow direct contact with the sea.
