

Originally commissioned by a repeat client and set for launch in the summer of 2025, the new Delta Powerboats 72 integrates timeless craftsmanship with cutting edge technology and performance. Developed in collaboration with Mannerfelt Design with an enduring carbon fiber construction and sociable deck arrangements, the 72 is intended to excel with large day parties as well as on longer voyages, offering unmatched cruising comfort, pace and efficiency. Buyers will have the opportunity to choose drivetrain between twin IPS-1350 inboards or quadruple V12-600 outboards. Regardless of choice, the 72 is designed to deliver a fascinating on-the-water experience supported by generous toy storage, a transformer lifting platform and a tender garage. The exterior deck areas include multiple options for lounging, providing comfortable outdoor seating for more than twenty guests along with three different sun lounges spread across the deck and roof top. Below deck, the interior accommodates eight guests across four ensuite cabins including a full-beam master stateroom plus a crew cabin for two crew members.
