

SEAWIND 1370

AWARD-WINNING PERFORMANCE AND UNMATCHED COMFORT

Winner of both SAIL's Best Boat 2025 and Cruising World's Boat of the Year 2025, the Seawind 1370 represents a generational leap forward in catamaran design. Light and nimble through meticulous design and advanced lightweight construction, it handles heavy loads with minimal impact on performance. Built for a perfect balance of bluewater performance and liveaboard comfort, this award-winning catamaran is the ultimate choice for modern sailors seeking adventure without compromise.

Seawind Catamarans deployed countless thousands of man-hours in hull design and optimization, in this design collaboration with The Yacht Design Collective, and spared no expense in refining the crucial sailing ergonomics suited to a modern cruising couple. The new 1370 catamaran model has the high aim of striking the perfect balance between performance and comfort in a 45' bluewater cruiser – this catamaran is designed to be the best go-anywhere, live-aboard cruising sailboat available today. Our rigorous design efforts have produced a hull capable of truly thrilling light air and heavy weather speeds and impressive pointing ability while being easy to handle shorthanded or single-handed.
