

Bill Dixon & Kelly Hoppen: a creative partnership behind the new Pearl 73

The **new Pearl 73** showcases the long-standing collaboration between two of Britain's most respected yacht design talents: **Bill Dixon**, founder of Dixon Yacht Design, and the internationally acclaimed interior designer **Kelly Hoppen CBE**. Together, they have reimagined contemporary living at sea, creating a yacht that combines striking exterior styling with sophisticated, owner-focused interiors.

For the Pearl 73, Bill Dixon has evolved Pearl's signature design language with a sleeker profile, expanded glazing and a new Riviera-style aft deck featuring fold-down balconies. His vision seamlessly blends innovation, practicality and seaworthiness, while preserving the elegance and performance for which Pearl Yachts is renowned.

Inside, Kelly Hoppen Interiors introduces an all-new **Monochrome** interior concept, characterised by harmonious tones, tactile materials and sculptural forms. Her design celebrates light, texture and flow, creating a refined yet relaxing environment that feels like a true home on the water. The result is a sophisticated contemporary retreat, tailored to modern yacht owners and their lifestyles.

The Pearl 73 will make its world debut at the Cannes Yachting Festival, highlighting the successful synergy between naval architecture, exterior styling and luxury interior design.
