

I EXHIBIT A BOAT ON WATER ON THE YACHTING FESTIVAL
FORM TO BE GIVEN TO YOUR CAPTAIN

STEP 1

I make sure I have filled in my PAU (Emergency equipment plan) on my [Exhibitor Area](#) online before 2026/08/20.

I print my PAU and boat label (transmitted by the organisation), to present when I arrive at the entrance to the Vieux Port or Port Canto.

Please note: if the boat placard is not correctly filled in, you can modify it yourself by indicating the name of the boat. We remind you that random checks can take place.

STEP 2

I respect the arrival schedule of the boats.

**I come with mooring ropes and mooring lines (40 meters long minimum).
The organisation does not provide moorings for the boats.**

**If you don't have the equipment, please write to:
service.technique.yachting@rxglobal.com to get a quotation.**

STEP 3

At my arrival near the port, I introduce myself to the organization's host team on water by contacting them on:

- VHF 72 for Vieux Port.
- VHF 77 for Port Canto.

STEP 4

I wait at the entrance of the port, without blocking the traffic and I await the agreement of the host team to settle at my location, I present them my placard boat previously printed.

Warning: it is forbidden to position yourself on an unassigned place, nor to switch the boat positions without the agreement of the organization.

STEP 5

I make sure that my technical orders have been taken into account and i check that the electric power supplied corresponds to my order. Otherwise, an Exhibitors Desk is at your disposal to regularise your orders and needs according to availability and feasibility.

**REMINDER: The Harbour Office is not your contact of the show.
The organizer is your one and only contact.**

Please note: SYE exhibitors are reminded that electrical power will be reduced due to work on the port. Please limit your energy requirements to ensure that your equipment functions properly.
