QUALITY

It isn't necessary to provide a 1/1 scale file. You can prepare your visual at 10%, 25%, 50% of the final print size.

Depending on the final print size and the distance from which your image is seen, you will adapt the resolution :

- Small formats : near vision (less than 150cm), 300dpi at 1/1 scale**
- Large formats : far vision (more than 150cm), 150dpi at 1/1 scale**

TECHNICAL PARAMETERS

- 1. Margin of tranquility :** Do not place any important visual elements (logo, text...) within 200mm of the edge of the format.

The dimensions of the tent walls may be slightly smaller than indicated on your order form. Our installers will then need to trim the visuals to fit them.

By placing your elements in the safe zone, you can be sure that they will not be cropped during installation.
